INVESTMENT OPPORTUNITIES

Chabahar Free Zone

The Global Connecting Crossroad

The strategic position of Chabahar and the change in the weight of production cost of the finished price of all goods because of increasing transportation costs, has stabilized Chabahar's position at the top of the feasibility study list of most manufacturing projects, especially in industrial and energy projects.

In the past two years, the volume of investment requests submitted to the Chabahar Free Zone Organization has grown significantly. The requests that have resulted in contract and production in the past two years has rised in terms of the number and volume of investment and are greater than the corresponding figures over the previous 10 years. Development of the port and rail infrastructures, especially the opening of the first phase of Shahid Beheshti Port last year, has played a significant role in attracting attention to Chabahar. In the past two years, the Chabahar Free Zone Organization has completed a series of comprehensive, detailed, thematic and topical studies and tried to initiate a large number of projects in various sectors including tourism, industry, civil engineering, and the development of the region. On the other hand, we believe that we must make the best use of domestic and foreign sectors resources in completing our mission, which is developing infrastructures and assigned activities. We have provided investors with a list of capacities and feasibility studies for investment in Chabahar, along with the investment opportunities that we identified based on market study based on the relative advantages of the region. The details of these suggestions were made available to the investment vice president of CFZ and are subject to negotiation and follow-up. We hope that this collection will be used as a guide to promote understanding of the areas used by investors.

Chabahar with an area of about 9739 square kilometers and a population of 291910 people is situated in the south-east of the province and it has 135 kilometers of land border and 115 kilometers sea border (145 kilometers coastal line) and it is adjacent to the Oman Sea, located at the closest distance to the free waters of the world, the Indian Ocean, and it s the only oceanic port of Iran.

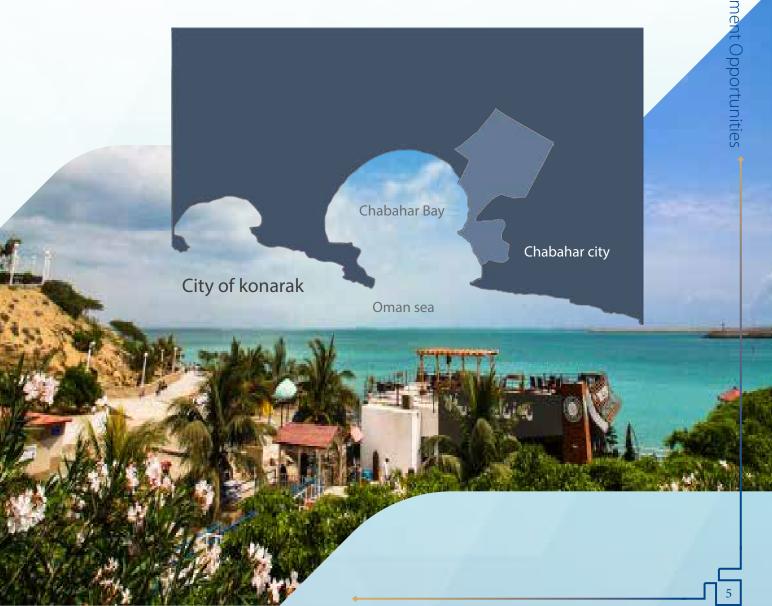

Chabahar Free Trade Zone

Established in 1993 as the only free zone having hinterland advantages for transit activ-

On the eve of the third millennium of economy and trade, now Chabahar Free Zone, has provided the necessary infrastructures to become a dynamic free zone according to international standards.

This area not only has an effective role in the national economy, but also playing the role of a regional hub for trade, manufacturing, transit and distributing base connecting East to West and North to South Economies.

Strategic Geographical Location of CFZ Between 4 Continents

Special Strengths of Chabahar Free Trade Zone

Transfer Goods to Afghanistan

Chabahar is potentially the best and cheapest route to procure needed goods from Afghanistan and exporting commodities to Afghanistan.

Central Asia

The most economical and the cheapest transit path to meet the needs of Central Asian countries.

Hinterland

Currently, among Iranian southern free zones, Chabahar Free Trade Zone is the only zone being connected to the mainland where there are no charges for loading and reloading.

Located Outside the Crisis Area

Chabahar Free Trade Zone is located outside the chaotic and tension-ridden region of the Persian Gulf.

Close to International Waters

Thanks to its geographical location, Chabahar is the closest port of the Persian Gulf region and the Sea of Oman to the international waters and oceans.

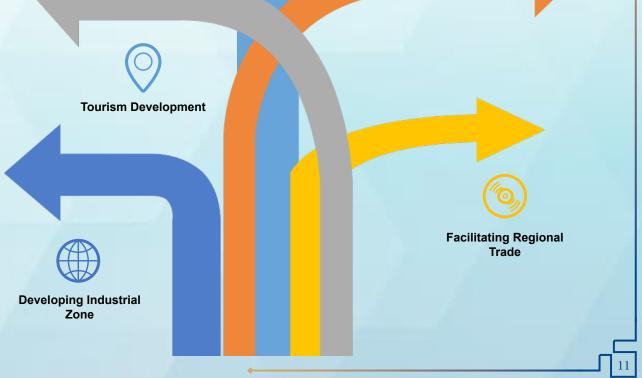

The East-West Corridor

According to the UN experts, Chabahar is one of the best crossing points on the corridor of transit and goods transportation and it is the southernmost point on the East-West Corridor

Chabahar

The Global Connecting Crossroad

www.cfzo.ir

in the Chabahar Bay, as well as its deep waters and natural cliffs, provides a suitable place for deep-water docks and an ideal anchorage coordinate for mega ocean liner ships, so this port has the capacity to become a mega-port. In other words, Chabahar is east Iran's transit gateway and a strategic area for the development of transit and industry. Among other coastal regions of southern Iran and even the Gulf states, this characteristic is unique to Chabahar
