

Chinese fishing ship hired by Iranian fishermen: Official

Farzin Haqdel said in an interview with the Islamic Republic News Agency (IRNA), 'As an informant, what I have seen in the films is more related to Hormuzgan, not Sistan-Baluchestan. These are mainly Chinese ships that are hired by Iranian companies

All of its employees and sailors are Chinese and the ship is owned by China, but it is leased by the' Iranians. In practice, Iranian companies are doing these services, which ship their products directly to China, Japan and the East. It means that its money goes back to Iran,' he said
